

The Miller Group Selects ZixCorp's Industry Leading Email Data Protection

SCOTTSDALE, ARIZ., and DALLAS — May 6, 2015 — [The Miller Group](#), (“MILLER”), comprised of affiliated companies Miller Capital Corporation, Miller Investments, Inc., and Miller Management Corporation, which provides venture capital, private equity, management consulting and advisory services, has implemented email data protection from [Zix Corporation](#) (ZixCorp), (NASDAQ: ZIXI), to secure and protect against email data breaches in transit and through mobile devices.

Committed to protecting its clients' business, financial, and personal information, MILLER chose the same secure email solutions trusted by one in four U.S. banks plus numerous state banking regulators, members of the Federal Financial Institutions Examination Council (FFIEC), the Consumer Financial Protection Bureau (CFPB) and the Securities and Exchange Commission (SEC). MILLER uses *ZixMail*[®], a desktop email encryption solution, to encrypt and decrypt emails and attachments. Encrypted email is delivered through *ZixPort*[®], a mobile-friendly secure web portal.

MILLER also protects sensitive client information on bring your own devices (BYOD) with *ZixOne*[®]. With ZixOne, MILLER employees can address client needs by enabling access to email on personal mobile devices without jeopardizing data protection, because corporate email never resides on the devices.

MILLER's focus is to make protecting the privacy and security of its clients' information a top priority. Not only has MILLER invested in upgrading email data protection but has also increased server and back up data encryption security as well.

Rudy R. Miller, Chairman, President and CEO of The Miller Group, stated, “Data breaches from small-middle size companies to the largest corporations in the world are a reality! Our organization set a benchmark to find the BEST data protection for email and mobile devices in the market. We reviewed a number of products, and it quickly became apparent to our team that the market leader is ZixCorp. Their solutions' ease of use and seamless integration into our email system was a very important component for our internal and external users. ZixCorp's launch staff and support folks were just outstanding! We are extremely pleased to join other financial organizations and regulatory bodies in utilizing this must have product in today's ever-changing cyber world.”

“Sensitive information is vulnerable to data breaches that can occur at any one of multiple access points. By deploying both our email encryption and BYOD solutions, companies proactively protect email data in transit and accessed with mobile devices,” said Rick Spurr, CEO of ZixCorp. “And, innovative, easy to use solutions are critical to ensuring employee adoption. We appreciate The Miller Group for recognizing our leadership and for selecting our solutions as key components in their strategy to protect their company and their clients.”
